

The Being Well Center

30 years. 10,000 patients . . . We know ADD.

Dr. Craig B. Liden, MD - Medical Director
Terri West, PA-C - Associate Medical Director
Jane Reck, MS - Director of Clinical Services

LONG DISTANCE SERVICES

It's a Small BWC World

We hear it all the time at conferences, speaking engagements, and workshops: "Your program sounds amazing. Do you know of anything like it near me?" Until recently, we've had to answer honestly: "No."

Now, thanks to emergent technologies, we are "meeting with" and treating patients aged 3 to 93 around the world. We can help you, wherever you are.

The Initial Visit

BWC Long Distance Services starts with an initial, 3-4 day evaluation at our Pittsburgh clinic. During this evaluation, we make the most of your travel time by conducting an extended interview, administering hands-on testing, performing a wrap-up session to review insights gained, and creating an individualized success plan to guide our long-distance support.

During the rest of your stay, we mobilize other targeted services which might include medical trial testing, specialty consultations (nutrition, speech/language, medical, etc.) and directive counseling services as needed.

Ongoing Support for Success

Via phone calls and video conferencing, we are able to provide our long-distance patients with the same detailed care and support as we give our patients right here in our own backyard.

Following the initial visit, we can also offer consultative services to help you locate resources in your own area who ascribe to our philosophies and who may be able to guide you through your individualized success plan.

Turning a Visit into a Vacation

Many of our long-distance patients use the initial evaluation and periodic follow up visits as family getaways. With the Pittsburgh Zoo, The National Aviary, Pittsburgh Children's Museum, Andy Warhol Museum, and Phipps Botanical Gardens all an easy drive from our offices, it doesn't take long for visitors to discover why Pittsburgh was recently named the Most Liveable City in the US.

The Being Well Center provides diagnostic and treatment services for individuals across the lifespan with ADD/ADHD, behavior control difficulties, academic/college performance problems, weight management issues and social/pragmatic difficulties including spectrum disorders.
